## ACKNOWLEDGEMENTS

This document was developed by Equinox Environmental Consultation and Design, Inc. in conjunction with the staff and Board of the Blue Ridge National Heritage Area. The efforts of the numerous groups and individuals that either contributed to the document or to the various planning activities that have led to its development are greatly appreciated. Special thanks are due to Penn Dameron, Executive Director of the Blue Ridge National Heritage Area, for his vision and support. Charlotte Gillis and Jami Hammond, Atlanta based staff of the National Park Service, provided valuable guidance and review. In the early stages of the development of this plan, members of the Local Heritage Councils located in each county in the region and the Qualla Boundary worked diligently to fashion locally based Heritage Development Plans. These plans, documenting heritage resources and outlining ways in which they could be protected, interpreted and developed, were an important ingredient in the crafting of the Blue Ridge National Heritage Area Management Plan. A sixteen member Interdisciplinary Team representing federal, state and local government as well as the Eastern Band of Cherokee Indians, provided valuable input, data and guidance in the development of the management plan document and the environmental assessment. Members of the Local Heritage Councils and Interdisciplinary Team are described in Appendix 3. Finally, thanks are due to the many government agencies and other organizations that provided heritage inventory data or other information used in the development of this plan.
